Practical – 2:- Semantic HTML5 Pages with Accessibility-Ready Structure

Problem Statement:- Develop static HTML5 skeletons for at least 10 StudentHub pages such as Home, About, Register, Login, Dashboard, Events, Profile, Contact, Admin, Notice, and StudyMaterial. Use semantic tags and accessibility-friendly structure.

Objective:- To develop the static HTML5 structure for a StudentHub Portal by creating at least 10 interconnected web pages using semantic HTML5 elements. The objective is to design well-organized, accessible, and user-friendly page layouts with proper navigation, ensuring a strong foundation for future styling, interactivity, and backend integration.
